

Small Fruit 2025 Blue - New Stock 2025 Name	NS Native	Description	Zone	Harvest	Pollination	New - 2024 Stock-Supplier Price/(# in Stock)
<b>Asparagus</b> ( <i>Asparagus officinalis</i> )		10 crowns feeds 2 people. Harvest 2nd year after planting. Deer resistant. Attracts pollinators. Full sun.				
Eclipse						4.00 each - 5 for 15.95
Mary Washington		Heirloom variety, full flavour, hardy, long lived, heavy producer of tall tender shoots. Delicious and easy to grow.	3	Spring		8.95 (30) 5 for 10.95
<b>Blackberry</b> ( <i>Rubus fruticosus</i> )		Attracts pollinators. Immediately after harvest, remove all canes that fruited to ground.				
Black Satin Blackberry		Thornless, large, dark black, sweet berries. Good for fresh eating, jams, jellies, cooking & baking. Very disease resistant variety. Semi-erect, grows 1 - 1.2m tall, 1.2 - 1.8m wide. Full sun, moist, well-drained soil. Produces on 2nd-year wood. Needs some support.	6	Aug	Self	13.95 (28)
Chester Thornless Blackberry		Thornless, semi-erect, self-fruitful. Clusters of pink-white, rose-like blossoms produce heavy yields of very large, jet black, round, firm, very sweet berries. Excellent for eating, jellies, jams, and pies. Grows 1 - 1.5m tall and wide. Full sun. Fruit is produced on previous year's growth.	5	Aug - Sept	Self	16.95 (64) Si
Polar Berry Blackberry		Produces white fruit that tastes like a blackberry. It was found growing among blackberries in Illinois. More shub like in habit. Produces fruit on second year canes.	5	Aug	Self	21.95 (6)
<b>Wild Blueberry - Lowbush</b> ( <i>Vaccinium angustifolium</i> )	Yes	NS Native species. Attracts pollinators. Good groundcover. Brilliant fall colour. Plant 30 to 60cm apart. Self-pollinating, but greater fruit production with at least two varieties for cross-pollination.				
Lowbush Blueberry	Yes	NS Native species. Urn-shaped white flowers tinged pink, in spring, produce sweet, dark-blue fruit, "wild" blueberry taste. Height 30-60cm. Sandy, well-drained, acidic soil. Optimum soil pH between 4.5 and 5.5. Wild blueberries spread slowly by rhizomes (underground runners), groundcover. Full sun for best production. Bright-red fall colour.	3	Midseason	Self	8.95 (80) 14.95 (20)

Small Fruit 2025 Blue - New Stock 2025 Name	NS Native	Description	Zone	Harvest	Pollination	New - 2024 Stock-Supplier Price/(# in Stock)
Brunswick Lowbush Blueberry	Yes	<b>NS Native species.</b> Urn-shaped, white flowers tinged pink in spring produce small, sky-blue, firm, flavorful berries. Height 30 - 60cm. Low, dense plant turns brilliant red and orange in fall. Rich, medium to wet, well-drained soil. Optimum soil pH between 4.5 and 5.5. Full sun. This variety originates from NS.	3	Midseason	Self	8.95 (46)
<b>Blueberry - Highbush (<i>Vaccinium corymbosum</i>)</b>	Yes	<b>NS Native species. Attracts pollinators. Excellent fall colour. Requires two <u>different</u> varieties for cross pollination to produce fruit.</b>			2 different varieties	
<b>Bluecrop</b>		Medium to large, light-blue berries, classic sweet taste. Vigorous, upright, open growth, productive. Ht 1.2 - 1.8m (4 - 6 feet). Considered best variety for adaptability, long production, high yield fruit, and disease resistance. Fiery-red fall colour.	5	Midseason	Any other variety	14.95 (153)
<b>Bonus</b>		Hardy, large berries with excellent sweet taste. Large fruit and high yields. 5-6 ft tall	4	Mid-late	Any other variety	29.95 (22)
<b>Cabernet Splash (V. 'VacBri1')</b>		Beautiful, wine-red new foliage matures to green washed with wine-red colour. Large, firm, sweet fruit tastes like Toro blueberry. Vibrant red fall colour. H 1.5-1m S 1.2m	5	Midseason	Self pollinating, but more fruit with another variety	22.95 (44)
<b>Chandler</b>		Extra large, sky-blue berries with full, robust flavour, long ripening season. Vigorous, slightly spreading habit. Ht 1.5 - 2m (5 - 6.5 feet). Wine-orange fall colour.	5	Mid to late season	Any other variety	14.95 (53) (198) Si
<b>Chippewa</b>		Half-high variety, with medium-sized, sweet, light-blue berries of excellent quality, largest sized fruit of half-highs. Compact upright habit. Ht 1 - 1.2m (3 - 4 feet). Attractive red fall colour. Very hardy.	4	Midseason	Any other variety	14.95 (91) (64) Si
<b>Duke</b>		Large, medium-blue, firm fruit. Mild crisp flavor, very productive. Heavy, consistent producer. Strong, upright growth habit. Ht 1.2 - 1.5m. Blooms late but ripens early, protects blossoms from frost. Disease resistant. Orange-yellow fall colour.	5	Early	Any other variety	14.95 (72)

Small Fruit 2025 Blue - New Stock 2025 Name	NS Native	Description	Zone	Harvest	Pollination	New - 2024 Stock-Supplier Price/(# in Stock)
Elliott		Medium to large, light-blue, firm, tart flavour, pick when fully ripe in Sept. Very strong, upright, open growth habit. Ht 1.2 - 1.8m (4 - 6 feet). Late bloom protects blossoms from frost. Moderate to high vigor, needs hard pruning. Red-orange fall colour.	5	Very Late	Any other variety	14.95 (186)
Mini Blues						29.95 (19)
Northblue		Half-high blueberry. Medium-sized fruit has "wild" taste, high yields, excellent for fresh-eating and baking. Open, upright, ht 1 - 1.2m (3 - 4 feet). Red-burgundy fall colour. Very hardy.	4	Midseason	Any other variety	14.95 (155) (198) Si
Northcountry		Half-high blueberry. Medium-sized, sky-blue color, classic wild taste. Ht .6 - 1m (2 - 3 feet), compact, spreading. Adaptable in less than optimum soil types. Good in patio pots. Scarlet fall colour. Hardy.	4	Midseason	Any other variety	14.95 (178)
Patriot		Large, firm, sweet fruit. Full ripeness is needed for sweet flavour. Partial lowbush parentage. Open, spreading habit. Ht 1 - 1.5m (3 - 5 feet). More tolerant of heavier/wetter soils than other varieties. Fiery-red to orange fall colour. Hardy.	4	Early	Any other variety	14.95 (127) (198) Si
Pink Lemonade		Rabbit-eye blueberry. Pinkish-white bell shaped flowers. Fruit pale green then dappled pink then deep pink when ripened. Delicious taste, add sweetness and colour to desserts. Upright habit, ht 1.2 - 1.5 m (4 - 5 feet). Red-orange fall colour. Self pollinating, long fruiting season.	4	Mid to late season	Self	22.95 (49) (198) Si
Polaris		Half-high blueberry. Firm, medium-sized fruit, aromatic and sweet. Upright and spreading bush habit, Ht 1 - 1.2m (3 - 4 feet). Red fall colour. Hardy.	4	Early	Any other variety	14.95 (138)
Reka						14.95 (2) (40) Si

Small Fruit 2025 Blue - New Stock 2025 Name	NS Native	Description	Zone	Harvest	Pollination	New - 2024 Stock-Supplier Price/(# in Stock)
Sweetheart		New highbush/southern hybrid. Only re-fruiting blueberry, self-pollinating. Medium-large, blue berries, sweet flavor. Ht 1.5 - 2m (5-6 feet) by a Spr of 1 - 2m. Bears in early summer and fall.	5	Early, Late	Self	19.95 (39)
Top Hat						14.95 (2)
Boysenberry		<b>Native to Pacific NW. Attracts pollinators, wildlife</b>				
Boysen Boysenberry ( <i>Rubus ursinus</i> x <i>idaeus</i> 'Boysen')		Cross between blackberry and loganberry or red raspberry. Dark reddish black fruit has a sweet and tangy flavor and is especially valued for canning and preserving and for use in pies and cobblers. Thornless.	6	Aug	Self	13.95 (12)
Dwarf Cranberry						
Hamilton Dwarf Cranberry ( <i>Vaccinium macrocarpum</i> 'Hamilton')		Dwarf, low, tight habit. Attractive, tiny, evergreen leaves turn red in winter. Tiny pink flowers in early summer produce red, edible fruit. Mainly used as an ornamental due to small size of the plant. Slow growing. Full sun to partial shade. Rich, consistently moist, acidic soil.	4	Sept	Self-fruitful	13.95 (20)
Highbush Cranberry ( <i>Viburnum trilobum</i> )		See Flowering Shrub 2023 List				
Currant ( <i>Ribes rubrum</i> , <i>Ribes nigrum</i> )		Attracts pollinators. Good air circulation. Full sun to partial shade, rich, moist, well-drained soil.				
Consort Black Currant		Extremely productive, produces clusters of medium sized black berries with blackberry flavor. Very hardy and disease resistant. Reliable and easy to maintain. Birds rarely bother this variety. Great for jelly, jams and sauces. Grows 1 - 2m high.	3	July	Self-fruitful	24.95 (4) 29.95 (22)
Ben Nevis Black Currant		3 - 4 ft shrub with tart, juicy black berries. Can be susceptible to mildew - allow good air circulation.	3	Mid-late summer	Self fruitful	29.95 (21)
Red Lake Currant		Large bright red berries. Fruit is good for jam, jelly, and wine	3	Late July	Self-fruitful	29.95 (31)

Small Fruit 2025 Blue - New Stock 2025 Name	NS Native	Description	Zone	Harvest	Pollination	New - 2024 Stock-Supplier Price/(# in Stock)
Wellington Currant		Medium to large clusters of black berries. Good for jellies, jams, or wines. H 1.2 - 1.5m x S 1.2 - 1.5m.	3	July	Self-fruitful	29.95 (10)
<b>Elderberry - (<i>Sambucus canadensis</i>) - See also Flowering Shrub 2023 List</b>	<b>Yes</b>	<b>NS Native Species. Attracts pollinators.</b> Huge flat umbels of creamy-white flowers (May-June) are edible, can be deep fried in batter, used in baking, or added to fruit salads. Harvest large, shiny dark purple clusters of berries in Aug/Sept. Berries are tasty for jams, pie and wine. Fruit is also used in food colouring and in nutraceutical industry for it's high anti-oxident properties and vitamin content. Vigorous upright, arching shape, attractive green compound foliage. Prune to shape in early spring, or can rejuvenate older shrubs by removing 1/3 of oldest branches to ground level. Partially self-fruitful, two or more varieties are recommended for better fruit production. Plant at least 2m apart, 4-5m between hedgerows. Full sun to partial shade, rich, moist, well-drained soil.				
American Elderberry	<b>Yes</b>	<b>NS Native species.</b> Small white, fragrant blooms in spring produce clusters of blue-black berries in late summer to fall. Slow, spreading habit. Good for naturalized plantings, shrub borders, screening, wet or low areas, fence rows, fruit production. Bright green foliage. Full sun to partial shade. Prefers rich, moist soil, average to wet. Tolerates average soil. Prune out weakened or dead stems in early spring.	4	Late summer- early fall	<b>Yes</b>	31.95 (3) 24.95 (1) 32.95 (21)
Scotia Elderberry		Medium-sized, black berries. High sugar content. Good flavour. Use for pies, jams, jellies.	3	July	Partially self-fruitful	29.95 (17) 32.95 (8)
Victoria Elderberry		Medium-sized, purple-black fruit. Use for jams, jellies and pies. H 2 - 2.5m S 2 - 2.5m	3	September	Partially self-fruitful	29.95 (7) 32.95 (10)
York Elderberry		Large, purple berries. Use for pies, jams, wine & pies. H 2 - 2.5m S 2 - 2.5m	3	August	Partially self-fruitful	29.95 (11)
<b>Goji Berry (<i>Lycium barbarum</i>)</b>		<b>Deer resistant, Attracts pollinators.</b>				
Goji Berry		Sprawling shrub with long, flexible canes, small, grey-green leaves. Brilliant royal-purple flowers (continuously all summer) produce bright-red, oval-shaped fruit which grow sweeter as they mature on the plant. Grow in full sun to partial shade, moist, well-drained soil. Staking may be necessary. Blooms on new wood. Ht 1.5 - 2.1m. Mulch to protect root zone, feed in early spring (ie. rose fertilizer). Rich in vitamins, antioxidant, eat fresh, frozen or dried.	5	Summer to frost	Self-fruitful	15.95 (48) 18.95 (19)
Dynamite Goji		Brilliant-red, large berries, thornless.	5	Summer to frost	Self-fruitful	44.95 (5)
Firecracker Goji		Brilliant-red, large berries, thornless.	5	Summer to frost	Self-fruitful	44.95 (5)

Small Fruit 2025 Blue - New Stock 2025 Name	NS Native	Description	Zone	Harvest	Pollination	New - 2024 Stock-Supplier Price/(# in Stock)
<b>Gooseberry</b> ( <i>Ribes uva-crispa</i> )		<b>Attracts pollinators. Good air circulation. Full sun to partial shade, in soil rich, moist, well-drained, pH 6 - 6.5.</b>				
Little Ben Gooseberry		Compact variety. Large fruit ripens from green to pink then red. Sweet taste, flavourful with tart skins. May be eaten fresh, processed for preserves or used for baking. Height 0.6 - 1.2m.	4	July	Self-fruitful	29.95 (48)
<b>Grape</b> ( <i>Vitis vinifera</i> )		<b>Full sun, medium water, good drainage. Pruning required, produces fruit on new wood. Attracts pollinators.</b>				
Concord Grape		Large, blue-black berries, in large, loose clusters. Juicy, sweet musky flavour, inside thick, tanin-rich skin, excellent for eating. Resistant to powdery mildew. Used for preserves, juice, wine, <b>fresh-eating</b> (has seeds). American variety, ( <i>Vitis labrusca</i> ), originated in 1849, Concord Massachusetts.	5	Early Oct	Self-fruitful	19.95 (3)
Concord Seedless		Medium to large, blue-black berries, slightly smaller than the seeded variety. Highly aromatic and very sweet. Skin slips off easily. Used for juice, wine, jams, jellies. Good for <b>fresh eating</b> .	5	September	Self-fruitful	19.95 (30)
Himrod Grape		Seedless-yellow gold, medium sized, crispy, sweet fruit. Excellent for home garden. Good for fresh eating.	5	Late Sept	Self-fruitful	19.95 (15)
Monukka Grape		Black seedless grape with large sized fruit, thin skin and crisp, sweet flavor. Protect from harsh winter wind. Full sun.	6	Mid season	Self-fruitful	19.95(64) Si
Sovereign Coronation Grape		BC introduction, fairly hardy grape, thick skin, blue-purple fruit, seedless, a distinctive musky taste. Good for <b>fresh eating</b> .	5	Midseason	Self-fruitful	19.95 (17)
Suffolk Red Grape		Red, medium to large clusters of seedless grapes. Mild, spicy-sweet flavor, good for <b>fresh eating</b> .	5	Early to Midseason	Self-fruitful	19.95 (9)
Thompson Seedless Grape		Large, dense bunches of sweet green seedless grapes. Note this is a variety too tender for overwintering outdoors in Nova Scotia without good winter protection.	7	Midseason	Self-fruitful	19.95 (15)
Riverbank Frost						29.95 (1)
<b>Hazelnuts</b>						

Small Fruit 2025 Blue - New Stock 2025 Name	NS Native	Description	Zone	Harvest	Pollination	New - 2024 Stock-Supplier Price/(# in Stock)
McDonald Filbert	5	No	2 or 3	Upright, small tree. Resistant to Eastern Filbert blight. Crop matures about 2 weeks earlier than other varieties.	August/Sept.	59.95 (7)
Sacajawea Filbert	5	No	2 or 3	Upright rounded small tree. Some resistance to Eastern Filbert blight. Early and high quality. Pollinization compatible with Jefferson, Felix, Dorris, York	August/Sept.	69.95 (6)
Wepster Filbert	5	No	2 or 3	Upright, rounded small tree. Resistant to Eastern Filbert blight. Early ripening, high yields. Pollinization compatible with Yamhill, McDonald, Felix, York, Jefferson.	August/Sept.	59.95 (7)
Yamhill Filbert	5	No	2 or 3	Short, spreading tree. Productive, small round nuts. Resistant to Eastern Filbert Blight. Compatible with all listed varieties.	August/Sept.	59.95 (8)
<b>Haskap Berry aka. Honeyberry (<i>Lonicera caerulea/ kamtschatica</i>)</b>		<b>Native to Canada, Russia and Japan. Attracts pollinators, birds (use 1/4" - 1/2" netting).</b> High yielding, pest and disease resistant. Flavor is a combination of a blueberry, saskatoon, and raspberry. High in antioxidants, vitamin C. Needs two different varieties for cross pollination (see recommended varieties in descriptions below, ratio 1:5, close proximity). Space shrubs 1.2 to 2m apart, 2.5 to 3m between rows. Blooms on old wood.				
Aurora Haskap		Companion variety for Borealis. Very productive and has large sweet tasting berries that are easy to pick. One Aurora plant can pollinate eight Borealis and vice versa.	3	Late June	Borealis	15.95 (8) 18.95 (24)
Berry Blue (aka Berry Smart Blue) Haskap Berry		Russian variety. Fastest growing and tallest varieties (Ht 1.8 to 2.4m), many flowers. Somewhat smaller and not as sweet of fruit, offers a high yield. Recommended by U of Sask. as a pollinator variety.	3	June	any other variety	18.95 (18)
Borealis Haskap Berry		Canadian variety. Sweet/tangy, large fruit. Not as firm as Tundra. Compact growth habit, height 1.2m.	3	June	Aurora, Honeybee, Berry Blue	18.95 (20)
Tana Haskap		Japanese variety. Late blooming. Oval, medium to large fruit. Tart-sweet taste. Medium-firmness. Height 1.5 - 2m	3	Mid-June	Aurora, Honeybee, Berry Blue, Borealis, Keiko	15.95 (3)
<b>Horseradish</b>						10.95 (6)
<b>Huckleberry</b>						

Small Fruit 2025 Blue - New Stock 2025 Name	NS Native	Description	Zone	Harvest	Pollination	New - 2024 Stock-Supplier Price/(# in Stock)
Berried Treasure box huckleberry Kiwi		Low spreading shrub with bell shaped flowers and blue berries in July-Aug. Brilliant red fall colour			Self pollinating	29.95 (25) NVK
Hardy Kiwi Vine	Actinidia					China & Japan - Edible fruit - Attracts
Dumbarton Oaks (Female) Hardy Kiwi Vine	Actinidia arguta 'Dumbarton Oaks'	Female kiwi. Shiny, ovate deep green leaves, fragrant white flowers. Small, edible fruit in Sept to Oct. Needs a male pollinator. Full sun to part shade. Moist, well-drained soil.	5			29.95 (4)
Prolific						29.95 (61)
Jenny Fuzzy Kiwi Vine ( <i>Actinidia deliciosa</i> 'Jenny') syn. 'Boskoop'		Native to China. Note this plant requires a sheltered location, zone 6b. Produces fuzzy fruit similar to kiwi found in grocery store. White flowers in June or July produce fruit in early fall. Large green leaves, climbing vine, requires support structure. Full sun to partial shade. Moist, well-drained soil.	6b	Sept	Self-fertile	29.95 (2)
Lingonberry aka. Partridgeberry ( <i>Vaccinium vitis- idaea</i> )		Ericaceae family (cranberries and blueberries). Low growing, semi-evergreen, woody shrub. Flowers on previous year's growth. Small, pink, bell-shaped flowers in spring, produce edible, bright red to dark red berries, 1/4-1/2" in diameter, highly flavourable but not as tart as cranberries. Harvest in fall after sharp frost. Full sun, well-drained, acidic 4.3 - 5.5 pH, amended with peat moss. Rich in anti-oxidants, benzoic acid, Vitamins A, C and magnesium. Pollinated by bees	5	Sept/Oct	Self-fertile	29.95 (13)
Red Candy Lingonberry		Strong grower, compact plant. Height 20cm x 25cm. Small, pink, bell-shaped flowers produce a mass of edible, bright-red berries. Tart fruit, best eaten with sugar. Good for pies, baking, preserves. Partial shade, to light shade. Best in peaty soil,	5	Sept	Self-fertile	39.95 (10) NVK
Loganberry		Hybrid between a raspberry and a blackberry				

Small Fruit 2025 Blue - New Stock 2025 Name	NS Native	Description	Zone	Harvest	Pollination	New - 2024 Stock-Supplier Price/(# in Stock)
Loganberry ( <i>Rubus x loganobaccus</i> )		Fruit resembles a blackberry more than a raspberry except the fruit is dark red. H 1.2m	6	July	Self-fertile	13.95 (20)
<b>Raspberry (<i>Rubus idaeus</i>)</b>		<b>Attracts pollinators.</b> Plant canes 12-18" apart. Full sun, average to moist, well-drained soil, pH 6.5 to 6.8.. Each spring prune out all dead and two-year old canes to the ground, leaving only last year's growth standing. Suckering habit, some spines.				
Jewel Black Raspberry		Midseason. Rich, black raspberry flavour. Good for fresh eating, pies and preserves.	5	Midseason	Self-fertile	8.95 (18)
Royalty						8.95 (10)
Nova		Almost spineless, tart bright red fruit. Produces second year from planting.	2			5.95 (44) (65) 8.95 5 for 16.95
<b>Everbearing</b>						
Autumn Bliss		Cold hardy, disease resistant, dark red. Produces fruit on current year's wood from late summer to frost. Produces fruit on old wood earlier.	4	Everbearing		24.95 (15) Li
Boyne		Everbearer. Gold raspberry with the same, sweet taste of red raspberries. Produces two crops, one in late summer to fall harvest, then again the following spring on the same canes. Excellent fresh or preserves or pies.	5	Everbearing	Self-fertile	8.95 (25 Pa)
Fall Gold		Large conical yellow-gold fruit. Very sweet - produces crops in early summer and early fall.	2	Everbearing	Self-fertile	10.95 (50)Pa
Heritage Raspberry		Everbearer, first crop mid-summer and second from Sept to Oct. Medium size berry, medium red firm excellent flavour. Nearly spineless.	5	Everbearing	Self-fertile	8.95 (16) (50) Pa
SK Red Mammoth		Improved Boyne - summer bearing, very large berries, semi thornless	2	Everbearing	Self-fertile	12.95 (25) VN
<b>Rhubarb (<i>Rheum rhubarbarum</i>)</b>						

Small Fruit 2025 Blue - New Stock 2025 Name	NS Native	Description	Zone	Harvest	Pollination	New - 2024 Stock-Supplier Price/(# in Stock)
Canada Red		Hardy, quick growing, popular variety in Canada. Shorter stems, more slender than many types, but very tender. High quality, good red colour, produces few seed stalks. Good for pies, baking.	3	May - June	Self-fertile	10.95 (48)
German Wine Rhubarb		Very sweet, large, dark red stalks. Good for pies, wine. Ht 60-70cm x Spr 60-80cm.	3	May - June	Self-fertile	14.95 (31)
Red Champagne		Long scarlet-red stalks with a deliciously sweet taste. Older variety, reliable and early.	3	May - June	Self-fertile	10.95 (42)
Strawberry Red						12.95 (9)
<b>Saskatoon Berry</b> ( <i>Amelanchier alnifolia</i> )		See Fruit Trees 2023 List				
Honeywood Saskatoon Berry	3	Self	None Required - However, planting more than one variety will enhance yields	Showy white flowers in early May, flowers a bit later than other varieties. Produces large red berries, which ripens over a longer period, in clusters of 15mm, dark, purple-blue fruit in summer. Full, slightly tart flavour. Used for eating fresh or making pies, jams, or jellies. Glossy, green leaves turn bright orange-red in fall. Less suckering habit. H 2.4 - 3m S 2.4m. Saskatchewan introduction.	July	29.95 (7)
Smoky Saskatoon Berry	3	Self	None Required - However, planting more than one variety will enhance yields	Showy white flowers in early May produce large red berries, which ripens in clusters of 14mm, dark, purple-blue fruit in summer. Highest sugar content, nice, sweet berry, full flavour. Used for eating fresh or making pies, jams, or jellies. Glossy, green leaves turn bright orange-red in fall. Slowly spreading, suckering habit. H 2.4m S 2.4m. Introduced in 1952, Beaverlodge, AB.	July	29.95 (19)
Standing Ovation™ Saskatoon Berry	3	Self	None Required - However, planting more than one variety will enhance yields	Narrow, upright habit. Showy clusters of white flowers in early May before foliage. Oval to rounded, dark-green leaves turn to red and orange in fall. Blue-purple, edible fruit in summer. Full sun to partial shade. Moist, well-drained soil. H 3 - 6m S 1 - 1.2m	July	49.95 (5)

Small Fruit 2025 Blue - New Stock 2025 Name	NS Native	Description	Zone	Harvest	Pollination	New - 2024 Stock-Supplier Price/(# in Stock)
<b>Sea Buckthorn aka Seaberry (<i>Hippophae rhamnoides</i>)</b>		<b>Deer resistant.</b> Plant 1 male for every 6 females. Pollinated entirely by wind, therefore situate male plant nearby female(s), ratio 1:6. Salt and drought tolerant, good for seashore, dry areas, erosion control. Nitrogen fixing. Highly ornamental, silvery leaves, vibrant fruit into winter. Full sun, well-drained soil, pH 5.5 to 7. Thorns. Flowers mid-May, 100 days to harvest.				
Juliet Sea Buckthorn		<b>Female.</b> Numerous, oval, orange fruit are high in vitamin C. H 2m S 3m.	3	Sept		42.95 (2)
Leikora Sea Buckthorn		<b>Female.</b> Produces juicy, yellow-orange berries. Irregular growth habit, height and spread 1.5 to 3m.	3	Sept	Pollmix, Glergo, Lord	39.95 (8)
<b>Strawberry - Early, Mid &amp; Late Varieties (<i>Fragaria x ananassa</i>)</b>		<b>Attracts pollinators.</b> Plant 30-45cm (12-18") apart, rows 1.2m (4 feet) apart. Full sun, loamy, well-drained soil, pH 6.5 to 6.8.				
Albion						
Honeoye		Top producer. Excellent, firm, large-sized berry. Optimum flavour. Easy to pick, long fruiting season, vigorous producer. Really good freezing quality. Good winter hardiness.	4	Early-Midseason	Self-fruitful	(200) Pa
<b>Strawberry - Everbearing</b>		<b>Attracts pollinators.</b> Plant in a container, or in the garden, in rows: 30-45cm (12-18") apart, row spacing: 1.2m (4 feet) apart. Full sun, loamy, well-drained soil, pH 6.5 to 6.8. Mulch with straw in winter, uncover in spring.				(Availability - see below)
Delizz						4.95
Gasana		Ornamental/edible strawberry. Large, showy pink flowers, juicy, sweet, conical-shaped fruit all summer. Grow as an edible ornamental, in a container, hanging basket or in your garden. Everbearing. Hardy and tough.	5	Everbearing	Self-fruitful	7.95 (5)
Pineberry		White to blush coloured fruit with red seeds. Fruit has a pleasant aroma and taste of pineapple, and is smaller than conventional strawberries. Note this plant will produce some fruit on its own but will have a much higher yield if cross-pollinated with other strawberries. Pineberry is a descendent of strawberries native to NA ( <i>Fragaria virginiana</i> ) and Chile ( <i>Fragaria chiloensis</i> ).	5	Everbearing	Self-fruitful	5.95 (47)

Small Fruit 2025 Blue - New Stock 2025 Name	NS Native	Description	Zone	Harvest	Pollination	New - 2024 Stock-Supplier Price/(# in Stock)
Ruby Ann		Ornamental/edible strawberry. Large, showy ruby-red flowers, sweet, medium-sized conical shaped fruit, all summer. Grow as an edible ornamental, in a container, hanging basket or in your garden. Everbearing. Hardy and tough.	5	Everbearing	Self-fruitful
